AsanSam Dongle

AsanSam Dongle is an ultimate phone flashing and mobile unlocking service solution for Qualcomm, Broadcom, Bada, DualSIM, Android, Infineon, Smart Phone, Swift and Trident based phones.

AsanSam Dongle Outstanding Features:

- Root/Unroot Android based Samsung cell phones
- Alphabetical phone model selection
- Automatic model selection with CPU information
- Info on required cables
- Fully customizable software assistant
- Automatic flash file selection for Qualcomm, Broadcom, Bada
- Informs user if phone must be connected with or without battery
- Read info from all Android based cell phones
- High speed Flashing
- Read/Write FULL FLASH for all Android based cell phones
- Super-fast USB flashing mode
- Safe and super-fast DualSIM, Swift flashing
- Repair all software errors
- Repair damaged NVM for all Android based cell phones
- Read/Write FULL NVM for all Android based cell phones
- Automatic login to the support area directly from the software
- Regular software updates
- Remove Pattern Lock with one click (need root)
- Reset User Code with one click (need root)
- Patch modem for Galaxy S, Galaxy S2

Supported models:

Qualcomm & Broadcom & Badawave:
